Profile

Lead Mobile Software Engineer with 15+ years of experience designing, developing, and maintaining production mobile applications across iOS and Android platforms. Experienced throughout the full software development lifecycle, delivering high-quality native and cross-platform solutions for enterprise environments. Proven technical leader focused on application performance, scalability, maintainability, and delivering reliable software that solves complex business challenges.

LEAD MOBILE DEVELOPER

ENDPOINT AUTOMATED SOLUTIONS – APR 2015-MAR 2026

- ▶ Led mobile architecture and development for enterprise warehouse management applications across iOS and Android platforms
- ▶ Owned technical direction, code quality standards, and architectural decisions
- ▶ Mentored mobile developers and conducted code reviews to maintain engineering excellence
- ▶ Integrated Zebra SDKs and multi-vendor barcode scanning hardware into Android production deployments
- ▶ Reduced production crash rates through structured debugging, memory optimization, and performance optimization
- ▶ Modernized legacy codebases by refactoring deprecated APIs and improving long-term maintainability
- ▶ Designed workflow-driven UI systems tailored to operational processes
- ▶ Collaborated cross-functionally with backend engineers, QA teams, hardware vendors, and operations stakeholders

MOBILE DEVELOPER

THE NERDERY – JUL 2012-MAR 2015

- ▶ Developed native iOS (Objective-C) and Android (Java) applications for clients across multiple industries
- ▶ Delivered production-ready applications within fast-paced agency timelines
- ▶ Collaborated with project owner, designers, and backend engineers in Agile environments
- ▶ Contributed to architectural planning, cross-platform mobile strategy, and code reviews
- ▶ Participated in client-facing technical discussions and solution design

Independent Mobile Applications

JOURNEY FAST (REACT NATIVE, TYPESCRIPT, IOS, ANDROID)

CREATOR & SOLE DEVELOPER | 2025-PRESENT

- Designed and developed a consumer-facing fasting and wellness application for iOS and Android using React Native and TypeScript
- Implemented fasting session tracking, goal management, progress visualization, historical analytics, and local data persistence
- Integrated local notification scheduling and background timer functionality to support long-running fasting sessions
- Developed session history management features including editing, deletion, and persistence of completed fasting records
- Led all aspects of product development including UX design, feature planning, testing, App Store preparation, branding, and release management

Education

Bachelor's Degree in Computer Science

Brown College

Jan 2004-Jan 2006

Published Apps
